

*Blu-ray Recorders: Can the SR-HD1250 and the SR-HD1500 be used with a computer just like an external Blu-ray burner since they have a USB and 1394 connections?*

The USB and IEEE-1394 connectors on the SR-HD1250 and SR-HD1500 are designed for transferring video files from external camcorders to the unit's hard disk drive. There is no provision to host the Blu-ray drive to external components.
